LR transforms applied on top of the specified schedule (conv, BS 2000 baseline 0.22 -> 0)
ramp: x 4^(2x-1) (x0.25 -> x4)
LR multiplier
fraction of training
applied LR, schedule left unchanged
baseline (no transform)
baseline spec, transformed
applied conv LR
fraction of training
schedule a search must find
baseline spec
spec giving the baseline back
5-knot grid oracle
oracle
specified conv LR
fraction of training
wave: x 2^sin(2 pi x) (x0.5 .. x2)
LR multiplier
fraction of training
applied LR, schedule left unchanged
baseline (no transform)
baseline spec, transformed
applied conv LR
fraction of training
schedule a search must find
baseline spec
spec giving the baseline back
5-knot grid oracle
oracle
specified conv LR
fraction of training
